

Year 11 Revision Planner 2019

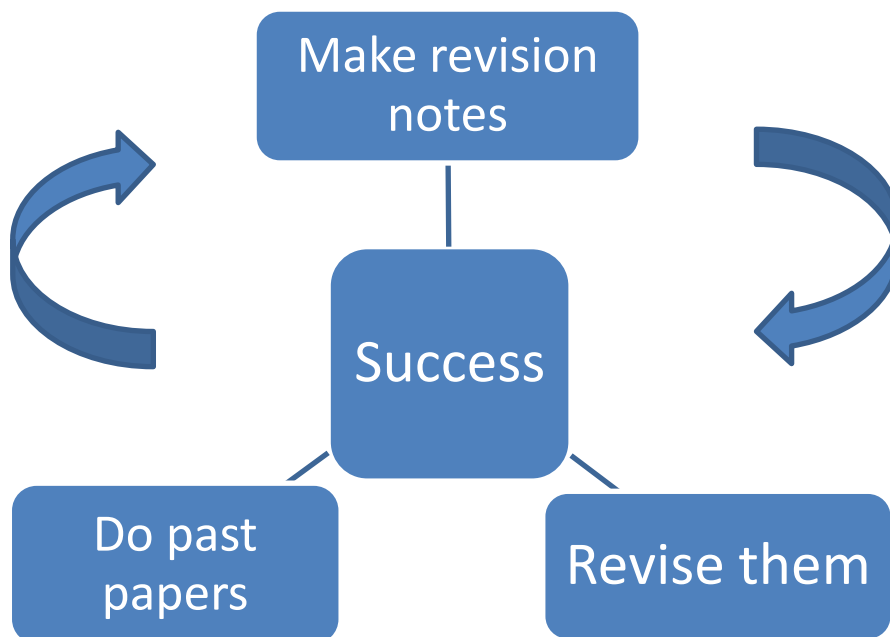

Name

The 6 things that successful students do:

1. Leave enough preparation time – You have plenty
2. Doing the right work- You know what you need to do
3. Follow a plan- This plan will help you
4. Correct past mistakes- IT is crucial , review your PPEs
5. Have a goal – Decide what you want to achieve
- 6. Do enough past papers / 5 per subject is recommended**

Preparation is about 80% of the work.

If this is done before I walk into the exam room, I will be ready.

Revision checklists are on the VLE under school life- revision- 2018 GCSE checklists

Past papers can be found on the VLE and subject websites, ask your teacher for help

THIS DOES NOT INCLUDE THE REVISION SESSIONS IN SCHOOL AT EASTER

Examination dates

Subject	Paper	Date and time

Study advice

- Only work for 45 minutes at a time for each subject
- Revise the whole course, not just the topics you like
- Stick to the timetable; if you don't have enough time just cut down the session lengths or add sessions if needed
- Tick off when you complete each session and highlight those you have missed, this will give you the confidence to know you are 100% prepared
- Turn off all devices except calm music if needed
- Use a variety of revision techniques- mindmaps, revision cards, lapbooks, ICT, teach a friend
- Do maths regularly – 25 minute sessions, use mathswatch and mymaths
- **Attend in-school revision sessions** led by your teachers; ask where you are going wrong- **in bold**
- Do several past papers with and without your notes; see where you went wrong, then do them again- use your mock notes
- If you don't do a language or option C, substitute this with another subject that needs extra work, this is an opportunity , don't waste it
- Those doing separate science need to add in B3 C3 P3 practice papers
- Past papers will be available on our VLE under school life/revision/past papers/subject

Monday 11/2	RE lunch R23 History R30 English R19		Science physics		Maths	
Tuesday 12/2	English after school R49 Maths after school		Biology		Languages
